NOTE FOR: Chief, Information and Management Support Staff, OL

FROM: [redacted]
Chief, Supply Division, OL

SUBJECT: Office of Logistics Annual Planning Conference

Dave,

1. In response to your request for a list of conference topics which I feel should be discussed, I am having a difficult time identifying those areas which would be at least of minimal interest to all conference attendees. Those subjects which cross the most organizational lines have been pretty well staffed-out and discussed at previous conferences, i.e., reorganization of the Office of Logistics; LIMS and its impact on O/L; HOME; etc., etc.

2. From a Supply Division point of view, the only new topics for discussion that we have coming up are: Bar Coding and its impact on Logistics, both in the near and distant future; automation (LIMS) and its effect on how we are presently organized; Regional Support Activity [redacted] and their impact on the office's total procurement workload. Other than these, the only other subject I can think of which would be worth discussing to all of us is in the personnel area. It may well be worth our time to talk about such things as inter-Division as well as inter-office rotations; assignments to specific jobs outside the office which are not related to any of our specialties; and, last but not least, the proposed Logistics Management Development Program. As far as the latter is concerned, we may want to talk about such things as: will there be quotas or, as usually happens in this kind of program, will this simply be a Supply-supported operation which would deteriorate into an enhancement of the present SOT program.
